

A Note from the President

Let me introduce myself to those of you who don't know me and my family. My wife Carey and I have two children, Lauren and Liv and we all enjoy the experience of being a member of IGC. Carey and I enjoy golfing with friends and the girls love the cheese balls and riding on the carts, hopefully in the future they will also enjoy the golf experience.

Because of our fondness of the golf club I thought it important to help out as much as I can. After being on the Member Guest Committee for the past few years I decided that running for the board would be a rewarding experience. Over the past year I have enjoyed working with the staff and board members. Every member needs to understand the amount of time and commitment these people put in over the course of the year and I would like to thank them for that.

As for my term as President I have a few goals. First, we need to continue with our fairway seeding program. Ryan is doing a great job with that and I think we started to see the results at the end of last season. Second, I want to work with Steve to continue to offer great food at a reasonable price. With the economy as it is we need to be innovative when it comes to generating new sales. Steve has done a great job with the Theme Buffets and I think that we offer some of the best food and service in the area. Third, I will work with Paul to find more ways to get golfers on our course. Paul has worked hard to offer added "value" with the memberships so people will want to come to IGC to golf. Last, it is very important that the board continues to be fiscally responsible. Our golf club has considerable costs associated with running it and we need to manage our expenses so we can continue to provide a great golf experience at a reasonable price.

I look forward to seeing everyone on the course this year and offer an invitation to everyone to contact me with any ideas on how to improve our golf experience or compliments that you want passed on to the people who work so hard to give us what we have.

Thanks

Justin B Borchardt
